

CARMASTERS INC. Goes Green!

One of the first shops in L.A. County to offer the state-of-the-art

ECO-FRIENDLY car wash!

- Highest level of Biodegradable products specifically formulated for automobiles.
- State of the art nature-friendly chemicals spray the vehicle; penetrating under dirt/dust (creating a shield between dirt and paint)
- No high pressure water and soap scum to seep into the earth or into waterways
- Special micro fiber cloths remove dirt, and do not damage or scratch the paint job; with no waste of natural resources
- Washing a car at home uses typically between 80 and 140 gallons of water, while commercial car washes average about 45 gallons per car.
- We use approximately one quart of water pr car.
- No water flow into storm drains or open water bodies; which poisons the aquatic life and Eco-systems
- NO harsh detergents or chemicals
- Chlorine and phosphate free (non-petroleum based), no toxic residues

100 percent better than conventional washing

Why has Carmasters Inc. stepped up to the plate to bring its customers a cleaner, green-friendly service? Because there is only one Mother Earth. Carmasters Inc. uses the same top of the line nature friendly chemicals for the detailing process too, making your car look like new again.

Whether your car was just purchased or leased from the dealer- when WE at Carmasters Inc. polish, wax and treat the car, it looks better than when it came out of the show room. Choose our environment friendly services today and be amazed by the fantastic results. We are confident you will leave our facility with a big smile; knowing you were part of the solution and you will have saved our environment too.

Think Green When Washing Your Car

Few people realize that washing our cars in the traditional manner is one of the most environmentally unfriendly chores we can do. We promise not to pollute waste water and to use NO hazardous ingredients while providing topnotch service to your vehicle.

Satisfaction guaranteed!
